Professional Summary

I am a dedicated and motivated game developer with approximately three years of experience in game tools, systems, programming, and development processes. I continually seek to learn, enhance my skills, and apply the knowledge I've acquired through my education and practical projects. I am excited to bring my passion, collaborative spirit, and problem-solving abilities to a game studio, contributing to the creation of exceptional player experiences.

Work Experience

Programmer, Tech Lead

May 2026 - Dec 2026

Ratter / RatterStudios

I did my internship at *Ratter / RatterStudios*, building Stockholm1646, a historically accurate game in Unreal Engine 5.8.

Developer, Designer, Scripter, Artist

Jun 2021 - Mar 2023

Crackshell AB, Stockholm

Hammerwatch Anniversary Edition – Designed levels, scripted events in engine and programmed enemy behavior.
Hammerwatch II – Created environment pixel art and coded enemy behavior.

System Administrator

Jun 2023 - Nov 2023

Småland Sportfiske AB, Tingsryd / Urshult

Manage in-store inventory and lead webshop development and product digitalization to streamline sales and improve customer experience.

Education

Game Programmer, 550 yhp

Sep 2024 - Present

Futuregames, Stockholm

At **Futuregames,** I am improving my abilities in game programming and honing my skills in Unity, Unreal, C#, and C++.

Projects

Thornbound

May 2025 - Jun 2025

Interaction programmer, Gameplay Programmer

During the Thornbound (GP3) project, I worked as a programmer and created the game's interactive system, enabling players to pick up and interact with objects like doors, notes, and items. I implemented it using Unreal Engine Blueprints with focus on proximity, collision, and performance optimization, gaining valuable experience in Blueprint scripting and problem-solving.
